Christchurch Central 8011

# OUR MISSION

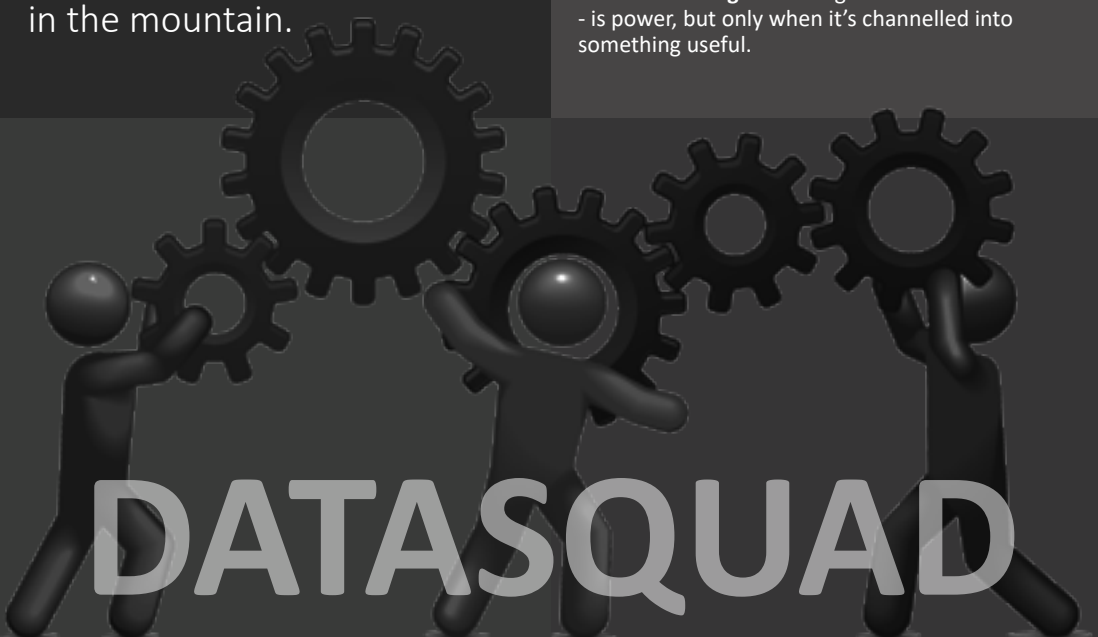

Orbica's DataSquad is a collaborative, client-centric team with a passion for big data problems. We deal with all kinds of data, tackling even the tasks in the "too hard basket" using our location data smarts to take you beyond ordinary business intelligence into geo-intelligence: data like you've never experienced it before.

Unlock the potential of your data and find the gold buried in the mountain.

# DATA OVERLOAD!

Right now, you're sitting on a goldmine. In this digitally transforming world, we not only have information at our fingertips: we also have it stockpiling in a myriad of digital spaces, just waiting to be discovered.

Information - or data - is an asset that can help your organisation **save money**, **generate revenue**, **improve customer experience** and **improve decision making**. Knowledge - or information - is power, but only when it's channelled into something useful.

# DATASQUAD

## UNLOCK THE VALUE

-  Investigate & discover
-  Collect
-  Engineer & develop
-  Aggregate
-  Interpret & analyse
-  Visualise
-  Automate
-  Innovate

## SO... LET'S GET STARTED

Seeing is believing: let us demonstrate the power of the DataSquad for you with a free consultation. From there, we can map out a plan tailored to your needs with recommendations and opportunities you may not have even imagined.
